My responsibilities included:

- Writing auto tests;
- Maintaining existing auto tests;
- Refining and creating logic in the project;
- Managing the testing process within the team;
- Worked with tools such as:  
Jenkins, cucumber, jira, PostgreSQL, insomnia.

## Education

2021 - 2023

School 21 in Moscow

## About me

I always strive for continuous improvement and professional growth, have a passion for learning new technologies and strive to achieve high standards in my work. During 10 months of working as a Java autotester, I have gained valuable experience and am ready to apply it to achieve team and company goals. I also have many C, C++ and Python projects completed as part of my training at School 21, where I learned how to communicate effectively and find solutions to various problems. Development has always been my priority, so I am open to new interesting projects and ready to learn new things
